NAVAEP seeks Tribes for WiFi Hotspot Program

In response to the COVID-19 pandemic, the NAVA Education Project in partnership with the Santa Fe Indian School has created the New Mexico Tribal Hotspot Program to provide mobile WiFi hotspots in Tribal communities. The hotspots will connect to existing Tribal broadband networks, such as those established networks at Tribal libraries, which may be now closed to stop the spread of the highly contagious virus.

The hotspots will provide internet service in preparation of the U.S. Census Bureau resuming field operations, Update Leave or the delivery of census forms to homes on Tribal land in June. The hotspots may also aid in voter registration or absentee voting as 2020 it is a presidential election year, or aid in telehealth consultations. Read more.
