**Comments:**

Please include acceptable infection and death rates. Please describe in detail how a barber can stay 5 feet away from a customer and sit their hair. Please provide specific direction regarding cleaning schedules as well as direction concerning cleaning products. Please describe the number of ICU patients Sandoval County hospitals should expect and for how long. Please describe how this is anything other than a political ploy designed to try to make the governor look bad. This is foolishness. This does not represent what is in the best interest of your constituents.
