Comments:

It seems our governor is "holding us hostage" - there is NO reason not to open many businesses - especially doctor's and dentist's offices . I lost a tooth filling about 6 weeks ago, and can't get it repaired - two previously scheduled appointments were canceled/extended when the "clear" date was moved forward by our esteemed socialist governor. My appointment is now in July! My husband has had his dermatologist appointment rescheduled twice also (basil cell needs to be removed)... Book stores, hair salons, smoke shops, ALL retail stores, service providers - everyone needs to get back to work. The owners of these businesses are more than willing to abide by "social distancing" and "cleanliness" guidelines.....they can make it work, if only the governor will let them!
