Comments:

I own a photography company and we are always social distanced from our clients especially since we do most sessions outside. We work with only 1 client or family at a time and can work safely following all guidelines. I feel that not allowing us to open our business is unfair and unnecessary. I own my own business and care 100% about my customers and will go above and beyond the guidelines to ensure they are not compromised at all. While we have been in lock down I have visited those businesses that were deemed necessary and they do the bare minimum, so why is it fair that they get make a living and I don't? It should be about who can work safely and who can't because all businesses are necessary to keep our state going.
