## Comments:

The people here in our community want us open. Weve applied for the Government Assistance since March 30th and have received no Government Assistance, so please allow us to open for our customers at least 20% max occupancy. We are only 2700 sqft and are able to better control social distancing and sanitizing than the larger boxes. We should be considered an Essential Business, providing spiritual guidance and well being....Please lets start reopening the economy with reasonable and healthy guidelines!
