RE: Horse Advisory Council:

If you will review the video from the 2/20 horse advisory council meeting, you should note that several topics of concern have not been addressed.

The proposal does not define range, sanctuary or reserve. Don't know how you can plan if there is no healthy range

The forage is gone, it's like a wasteland now and no one has addressed the ecological issues at all .

Serious ADOPTION efforts need to be made NOW to remove the feral horses; Commissioner Bruch agrees. This should have been started years ago.

Instead of darting the mares year after year, why not geld the males?

One resident suggested it should be a state law to chip horses. Sandoval county could start the process
