**Comments:**

Open up. Get people working. Bill's need paying, food needs buying, etc. . . Forcing poverty on people isnt right. School was let out and it needs to start in August. Parents arent allowed to not school children, but the governor can. A parent isnt allowed to not have a child recieved health care, but the governor can. This needs to stop asap. The governor is on a ego trip and she needs to be stopped. This state is just stupid for allowing this governor to continue with anything. She needs to go.

Her medical staff are brainless. This needs to end. Not tomorrow. Now. People need to work.
