Comments:

Dear Members of the Sandoval County Commission

Thank you for continuing to fund the Sandoval Economic Alliance. I believe that now is a perfect time for SEA to make it known that Sandoval County, New Mexico is open for business, is a great place to build a business, a great place to hire educated hard working employees, and a great place to raise a family. SEA can and will work closely with existing businesses as they begin to open back up and help figure out ways for them to overcome these last several months of closure. Now that many major manufacturing companies are beginning to bring at least portions of their production back on-shore, it is critical that we get our name and assets out there and in the mix. Now is the time to get these on-shoring companies to take a first or even a second look at Sandoval County. Without a non-profit such as SEA and the County Economic Development Dept. {working hand in hand} I don't believe this would be possible. I have had businesses in Sandoval county for 40 years, served on many different community committee's, and have served on the SEA board for the past 6 years. I believe that SEA has done a "good" job but I also believe that with the new leadership of -Fred Shepard- and SEA's highly capable board, SEA can do A "GREAT" job. Again "THANK YOU" J.R. Allison
