Comments:

I want to comment on the benefits of having a permanent animal shelter for Sandoval County. The benefits are tri-fold to the citizens of the county. Public safety is improved by having less stray animals roaming the highways and homesteads of families. Opportunities for education and recreation will rise for existing pet owners and the future stability of individuals in this new socially distant lifestyle. An actualized benefit is to your interest in increasing vocational options and security.

As a step in the staircase of practical infrastructure investments, A permanent installation benefits the people of Sandoval County, visitors, and citizens of surrounding counties.
