Comments:

The Commissioners have heard from every resident living on Madrid Rd. Our issues can be stated as follows: 1) Did the Commission violate fundamental legal notice requirements at the time it voted to exclude Madrid Rd from the list of roads to be serviced? If so, is the decision void until residents and others impacted are given proper notice and an opportunity to comment on public record? Further, if void until lawful notice is given, does the County continue to assume responsibility for road service until such procedural obligations are met? 2) It is not disputed that the County has provided such road service for approximately the last 47 years. In that time the County has also provided snow removal service and put up where necessary protection barriers. Because of this continued and long service, which all residents have relied upon, does the County now have a continuing duty maintain this road?

May I respectfully suggest that the Commission refer these issues to its legal department for purposes of preserving public integrity? Respectfully Submitted, James Marcanti
