Subject: Comments on the Proposed Sandoval County Oil and Gas Ordinance

Dear Ms. Hill,

This is to say that I support the proposed ordinance. The New Mexico OCD has in place protections for our water and air, and is doing an admirable job for us. Oil and gas development is important to our county, our state, and our country, and provides substantial revenue benefit.

The 'Special Use' requirement many are promoting does nothing to protect the environment, and appears to me to be merely obstructionist legislation.

Sincerely,

Roy L. Clagg
