Comments:

I find it deplorable that you, the commission, are contemplating raises for yourselves in this time of economic uncertainty. We all know these are hard times, and if our county has money to spare, it should go to programs and staff who are actually helping people who are hungry or are in dire straits. Giving yourselves raises at this time shows the people of our county where your values lie and the kind of people you really are. Shame on you if you pass this. Shame.
