Working on the reservation yesterday, roads were somewhat bladed but not passable. Drove from Counselor, (you might want to spell that right in your notice.) yesterday going through Ojo Encino on the back road, and yes potholes all over the old paved road. Why is it you only consider bus routes, what about the people that need to get out to the doctors office or to go buy groceries. I took some pictures to send to my boss to prove the roads are inaccessible. District 5 has not changed since RW Johnson and Ben Toledo were commissioners when it comes to the roads. The medical field gets billions of dollars to help us, but not all of us can get to the doctor. Why don't all you commissioners come out and really see the roads, especially now.
