**Comments:**

As a long time resident of Sandoval county, and participant in our elections process in our county, historically communities in our outlying areas do not participate in our elections. I have found it interesting that so many from the outlying areas are making so much noise about the County Commissioners redistricting plans. Rio Rancho makes up 70% of the population of the county which more than justifies our having 3 commission districts to represent us. I believe Map D reflects equitable representation of the facts on merits of population alone. Trying to disenfranchise the majority of the population through redistricting them out of representation is not an equitable solution. I would like this read into the public record please.
