<b>Comments:</b>
Adair's maps were drawn without any consultation with Native Americans or other stakeholders. They pack Native Americans into one district and gerrymander other districts to eliminate any competition in order to lock in permanent minority rule of the county. Why are the Republican commissioners afraid of competition? Adair's tweets reveal obvious political bias that has infected his redistricting plans. The Eichwald Plan is fair and equitable and meets or exceeds all accepted nonpartisan criteria for redistricting. The Eichwald Plan should be use as the basis for conducting additional stakeholder consultation and then modified as appropriate.
