Comments:

Dividing cities/communities removes the power of their voices. A fair process starts with a non biased architect. Using the very biased company of Rod Adair leads to unfair maps. A quick google of his name will easily show you this. Not involving the Native Pueblo Governors in the process is another proof Adair cares nothing about a fair process. Putting Sandia Pueblo into a district with Cuba an hour away is another. So many RED flags on Adair's maps that will stand out like beacons when this hits the courts. All us voters want to see is a "fair process" to bring a fair maps. This commission is better than this gerrymandering allowing commissioners to select their own voters. Very clear that's what this is. The Fair Map presented by Commissioner Eichwald will follow a plan that keep's communities together & follow all the rules set forth by law. Thereby keeping this redistricting out of the courts, wasting time & taxpayers dollars. Please consider doing the right thing to protect democracy
