Comments:

I would like to thank the Commission in advance for restoring road maintenance to our little corner of Sandoval County at the base of the Sandia Mountains in the Evergreen Hills subdivision/community.

I'm not sure what led you to take away this service for which we have paid taxes for decades (and continued to pay taxes for approx. one year with zero services). Poor road conditions--particularly after last year's 100-year rain events--have caused homeowners to lose out on prospective buyers when they were trying to sell their homes, have led to damage to our vehicles and in some cases expensive repairs, have led to issues and delays for first responders, have led others to put off developing their property, and have of course significantly increased our travel times.

But in the end it appears that good government has prevailed. A big thank you to Comm. Bruch for her assistance and to others that will vote with her to end our taxed but no-services status.
