**Comments:**

Regarding Resolution 1-12-22.10d Accepting circle drive into the county road maintenance inventory. Please consider the emergency response needs for the tax paying residents and tax paying recreationists. The roads are dangerous at best and do not allow for easy access to trail heads or for the residents. Please also consider fire hydrants in the event that the residents should have need for a home to be saved and to prevent spread of fire in the event that a fire starts. Better access to this area will support the residents and more importantly will provide equitable access to recreationists that live and work in this area as well as tourists that want to take in the beauty and joy of the Sandia mountains. Thank you for consideration and time.
