Comments:

I write in support of adding Circle Drive to the road maintenance inventory for Sandoval County. Maintaining this road is essential to ensuring that emergency vehicles can safely and efficiently access the residents who live along Circle Drive, all of whom live within Sandoval County. This will also improve the safety of those driving the road themselves. Recently, a large truck was broken down on Circle Drive due to a CV joint breaking. This was the result of driving over one of the large ditches that has developed since road maintenance was discontinued. As a result, the road was blocked for a number of hours until a tow truck was able to move the truck. During this time, vehicles were unable to drive in or out of the neighborhood. This incident would have been avoided if road maintenance had continued.
