**Comments:**

I strongly reject Sandoval County resolution 2-23-22 10A, which opposes the Federal Government's 30x30 land preservation goal. I strongly support the federal goal of 30% land preserved in a natural state, and I strongly support Sandoval County contributing to this goal, and helping to halt the process of climate change. We absolutely need to do everything we can in an official capacity to halt climate change. Furthermore, preserving natural land in our beautiful county has the added benefit of attracting tourism and the positive economic impact of people engaging in outdoor recreation. Please, please preserve our lands in their natural state. Thank you.
