To whom it may concern:

I am appalled at the move to pass resolutions opposing the preservation and management of 30% of land and waters by our federal and state government proposed by Jay Block. At a time when our biosphere is in dire peril due to human actions and our climate and biodiversity are collapsing it is the opinion of scientists and 85% of American citizens that we must do all we can to try and preserve a future for our children and other living creatures. To stick your head in the sand and oppose this for the sake of greed, short term profit and ignorance is a crime we cannot afford to play with. Do not even consider such a betrayal of humanity and the environment.

Thank you  
PJ Lincoln
