**Comments:**

Dear Sandoval County Commissioners:

I've read Jay Block's Resolution in Opposition to the 30 by 30 Land Preservation Goal in its entirety. I request that the Sandoval County Commissioners not pass this Resolution. The 30 by 30 Land Preservation Goal is a forward thinking document to make sure that Sandoval county will have clean land, water and air for future generations. Commissioner Block seeks to make sure all land and waterways are available for use by any business with no regard to the long-term damage to our land, waterways and air. This is quite short-sighted and puts profits ahead of people's ability to remain in their community with guaranteed clean land, water and air. If the land, water and air are degraded below healthy levels, is the game plan for Sandoval county residents to move elsewhere at their own expense?
