**Comments:**

Sandoval County Commissioners,  
The Local 412, and our 1800 members, stand against the resolution to oppose state and national programs for climate change. The transition to clean energy creates many jobs for the building trades, these are good paying and economic boosting jobs in; HVAC, electrical and pipefitting. Sandoval county has no jurisdiction in this matter, and a waste of our members' tax payer dollars who live in this county is a gross misuse of their hard earned money. These issues affect the entire state and nation, a political statement is not necessary nor appropriate, and our members expect better from their elected officials.
