Comments:

I would like the commissioners to investigate the Dominion Voting Machines. I recently attended a presentation from DAVID CLEMENTS that showed how these machines could be manipulated. It is a non-partisan issue but one that should be investigated if voters are ever to trust election results again. There are several presentations on line, perhaps the best is the 8/14/2021 cyber symposium. All else pales if elections can be void by fraud. There were about 100 people attending the presentation and I'm sure that they will be for you to review the contract with Dominion and make sure that the machines are NOT hackable during an election. This is especially important for the 2022 & 2024 elections. Thank you for your service to the community and for your consideration.
