Two weeks ago this chamber acted quickly and passed a Resolution protecting the property rights of Sandoval County landowners against the Biden/United Nations 30 x 30 land grab initiative . Thank you. This same Biden administration last March announced its desire to federalize our Election System using Executive Order, if necessary. The US Constitution clearly states that state election practices are the task of state legislators with limited congressional oversight. Biden's act would be unconstitutional and the only way to stop more federal overreach is to take a stand and act locally. The 2020 election was fraught with irregularities as shared Wednesday evening In order to restore voter trust with Sandoval County residents we need a process that's transparent, accurate, secure, and managed locally. I implore all Commissioners to declare today a need for a forensic audit of Sandoval County. When one fraudulent vote is cast that disenfranchises every voter.
