**Comments:**

Taking away drop boxes is telling the disabled and elderly, their vote doesn't matter. There are 24 hour cameras on all of the boxes. That should be enough. If detractors really believe someone is opening a persons vote changing it or replacing it with another one that has the same print out ID numbers of the voter-why aren't they coming up with a solution to seal the vote so votes will not be tampered. Because they are not interested in the security of voting. They want to reduce, and suppress voting. If the commission supports this I will do everything in my power to let voters know who is representing them.
