Comments:

It is absurd to think NM's voting system is flawed and prone to mass voter fraud. It is widely considered the best voting system in the country and used as the model for other states working to improve the accuracy and safe-guards of their systems. The Big Lie that our voting systems are not secure and open to wide spread voter fraud is simply an attempt to undermine voter confidence to enable the creation of procedures that are designed to block and limit voter participation. Allowing these proposed changes to go through in itself is the only evidence of widespread voter fraud in existence as it is based totally on misinformation, falsehoods, and devious intent and manipulation of the public trust.
