Comments:

Dear County Commissioners,

I am curious as to what facts you have that support the supposition of increased risk of election fraud in our state as stated by: WHEREAS, there have been many changes in election laws over the past decade to increase voter participation; and WHEREAS, some of these changes have increased the risk of election fraud;

My experience as a New Mexican voter for over 40 years has been one where I have found the system to be fair. I have accepted the results whether or not my preferred candidate has been elected. I have not seen signs that there has been voter fraud to any extent that would jeopardize this democratic process.

As is being proven by the Senate Hearings on the July 6th riot at the Capitol, it is dangerous to declare that there is voter fraud when no significant fraud has been proven to have effected elections. Fear, suspicions and lies do terrible things to our community. I hope you are being responsible and have been watching the Hearings and have not been avoiding the evidence they are presenting to our nation. I ask you as Sandoval County Commissioners make sure that the system as we have it legally includes and supports all those eligible to vote.

A note: I have greatly appreciated our early voting opportunities and hope these remain in place.

Thank you for your service.

Laura Robbins
