Comments:

I thank all the commissioners for their public service to the citizens of our county. Please vote no to this resolution. I am concerned that this resolution is based on the radical Republican myth of the "stolen election". There were 60 court cases, a Supreme Court ruling and a ninja clown audit in Arizona. When those attempts failed to keep the Supreme Republican in power after he lost the election, Republicans tried to overturn the results at the state level and finally perpetrated an insurrection against the United States Congress. They are now undermining confidence in our elections themselves by attempting to dispute every election. This is how democracies die. We all took the Pledge "...and to the Republic for which it stands, one nation indivisible.... Our first civic loyalty is to the Republic not to a political party. Please do not pander to the lie. Remember we are one election away from dictatorship. After that, voting won't matter. Thank you for your attention.
