Comments:

I oppose Resolution No. 6-22-22.10. This is nothing other than a voter suppression measure masquerading as a "security of elections" measure. We register, we give our address, we sign our name. We have paper ballots that can be counted if necessary. Adding additional requirements when there is no hint of voter fraud in our county or state is clearly an attempt to make voting more difficult. Before you pass restriction on our right to participate in our democracy you need to show by concrete example that fraud is a problem and my bet is you are not able to do so. Please do not impose obstacles with this solution looking for a problem.
