Subject: Anti-wildlife feeding proposal

Yeah good luck trying to enforce that idea brought forth by a deputy sheriff. The closest sheriff substation to Placitas is the one on Idalia Road. I'm pretty sure the sheriff's Department comes out here and makes the rounds about twice a day. People feed the horses all over Placitas. So the sheriffs are going to come all the way out here to try to bust people for feeding wildlife? They don't have anything better to do? And I love the fact that for years and years they've claimed that the horses out here were feral. Suddenly they're wild when you want to outlaw feeding wildlife. WHOA NM has one in court and will continue to fight in court in court and win yet again. This commission doesn't even bother to enforce the county's planning and zoning ordinances. Do you know how many people have pictures of the horses on places like [Realtor.com](https://www.realtor.com) to try to sell homes or land?
