Comments:

The wild horses in Placitas are not a problem. They are healthy and not because people feed them. However, I believe what I do on my property is my business. If I choose to water or leave hay on MY property, I do not think it is the Governments business. If there is a problem in Placitas it is the 6000 people who have moved here since my wife and I settled into an existing home in 1984. There was no problem with the environment, the gravel pits or the gas lines. The more government interference in Placitas the bigger the problems seem to be. Put some speed traps and tell people to slow down not only in their cars but in their lives. The horses are not the problem Self-centered and selfish people are. Paul Chacho Jr. 505-867-3051. PS: How would you react if I want you to kill all the rattle snakes and coyotes because they get over my fence and want to kill my dogs? They are actually dangerous. Thank you for your time and service.
