Comments:

People of vision collaborated to create our National Parks and wilderness areas, develop vaccines and antibiotics, design, build and deploy the Hubble and James Webb telescopes. Even Albuquerque and Santa Fe have managed to reduce traffic speeds in some areas. Why then, can the County and State not collaborate to create an animal and bicycle-friendly slow zone between Los Ranchos and Placitas Village, and celebrate the existence of these wonderful equines, and perhaps save a spandexed peloton from an inattentive driver? Could it be that the City of Vision's Commissioners lack...vision? Reducing (and enforcing) a speed limit reduction from 50 mph to 35 mph over a mile of roadway would increase our commute time by a whopping 30 seconds. Surely we could live with this - and so could the horses and bicyclists. Please scrap your Ordinance to Ban the Feeding of Certain Wildlife.
