Comments:

Dear Commissioners,

I strongly support the proposed legislation to stop the watering and feeding of roaming horses in Placitas. These horses have destroyed my property and the surrounding lands that I have hiked for over 25 years. The once abundant plants and wildlife are now scarce due to the presence of over 150 horses ravaging the resources on the way to residents that feed and water the increasing overpopulation problem. Once drought tolerant hillsides are now dusty horse dung infested stables increasingly vulnerable to drought and less able to sustain quail, horny toads, pinon, and juniper as it has for hundreds of years.

Thank you for your consideration and service,
Elizabeth Gibbons
Placitas Resident
