**Comments:**

Dear County Commissioner,  
Regarding your vote later today: Do not vote in favor of criminalizing giving food or water to non game creatures, like wild horses. I live in San Pedro Creek Estates and thankful for the wildlife here especially our Wild Horse herd. They have visited our property and I turned on the hose so they could have a drink and afterwards they wandered away. I also keep a bowl of water out for our dog, water for birds and lizards too. We are living in THEIR home. Please be responsible and do not make this decision in this isolated and non animal friendly way. Where was your public meeting on this issue? We just went through a similar situation here in SPCE where, without a neighborhood meeting, our HOA Board voted to have our- OUR wild horse herd removed; there was a big backlash and that move was rescinded. Also this issue you are bringing up for a vote has certainly not been publicized either! I understand that in the wonderful Placitas, wild horses there roam free and residents cherish their presence. Giving them food and water is certainly the residence's choice and for those who don't like it or the constant presence of these critters , there are plenty of other places to live besides a place , like SPCE and Placitas, where there aren't wild critters roaming about! And Sandoval County needs to start looking at its wild nature scape and ensure it's protection.

Sincerely,  
Georgene Inks
