Comments:

Since public comment is not permitted during the call to canvas meeting being held on November 17 2023 I am expressing my comments here.
i attended the last week Sandoval County Commissioners Meeting. During the public time to speak i heard several report how well the recent November 7 2023 election went. It was reported by those who volunteered to work at the voting sights that they saw an improvement in several areas. This is encouraging and hopefully generates action to come together in cooperation to continue the goal of safe transparent integrity voting. However non-certified electronic tabular equipment was used. i strongly urge the Sandoval County Board of Canvas to not certify the results of the election due to the continued use of these non-certified electronic tabular equipment.
respectfully
Faun Gordon
