

On-Call HVAC Services
RFP FY26-SCPW-04
Addendum #1
Issued October 30, 2025

1. Section IV.B.3.b, "Licensing Requirements", states that the successful Offeror must hold a "current Contractor's License with an MM-1, MM-3, and MM-4 Classification, or with MM-98 classification". Our firm holds active New Mexico MM-1, MM-2, and MM-3 licenses. Could you please clarify if a contractor holding this combination of licenses would be considered responsive to the requirement, or if the MM-4 classification is a mandatory, non-waivable requirement for this specific scope of work?

An MMR classification is mandatory and cannot be waived unless the contractor holds an MM98 classification.
