Subject: Scott Quinn request for a new Communications Tower/Placitas Homesteads

To Whom It May Concern: I wanted to voice my approval for said proposal of a new Communications Tower to be located at Placitas Homesteads Lot:5A-1AW, Placitas, NM. For the record, cell phone service in the area is abysmal at best. In a modern society where everything is dependent on modern and updated technology-the area in and around Placitas is sadly lacking in good cell phone service and internet. It is critical to be able to call doctor's offices, the hospital, the Sheriff's office and to just be able to communicate on a daily basis with businesses and the like without having dropped calls, or not being able to call at all. For those who make their livelihood from working from home, it is imperative to have high speed internet, that is not quitting on you in the middle of a business transaction. As it now stands, a good percentage of CenturyLink customers as well as Verizon & ATT have to go outside of their house and stand in their yard or in the street to even get enough bars on their phone in order to make a call. In an age of technology, this is crazy. The sooner the new tower becomes a reality-sign me up. And yes, I will be able to see the tower from my yard/house. A small price to pay for an important phone call to my doctor. Respectfully submitted, Bridget Vaisvil 30 Dusty Trail Dr., Placitas, NM 87043

Subject: case number CU-26-001

As a Placitas resident, I support building a new communications tower.

Thank you!
